Promoted by Sh. Tapan Debnath, Ex-Deputy Commandant (Fire)/CISF along with Sh. Praveen Chaudhari with the challenging Mission of making society & Industry 'Fire Safe' & "Risk Free" by way of spreading awareness in society and sensitizing the industry towards Fire, Security & Occupational Safety of lives & property.

Sh. Debnath after working for 28 years as a fire & security professional has taken voluntary retirement from service. He is a Specialist in Risk Management, Major Emergency Management, Disaster Relief and Recovery, Fire Audit and Compliance, Tactical Intervention, Emergency Preparedness, Incident Command System, Training & Development.

Sh. Chaudhari as a fire & safety professional, has rendered 20 years of service. He is subject matter expert on Emergency management. His field of operations are design & delivery of training programs, Standards & Specifications and Compliance Audit.

As professionals who have 20 to 30 years of experience individually and who have been responsible for introducing innovative concepts in the area of fire protection, safety and security, they have joined hands for rendering their expert services as team members of the company.

Our objective is to provide our clients with fast, efficient and techno-commercially viable fire protection and security solutions incorporating appropriate technology for the specific risk and conforming to relevant standards & codes.

3G is specialized in fire safety training, Basic & Advance First Aid Training, NEBOSH International General Certificate, Fire Consultancy/Audit/Survey, Designing Fire Protection System, Maintenance of Fire Equipments, Fire Investigation, Disaster Management/Onsite/Off site Emergency Plan, Management of Industrial fire service & providing trained experienced fire fighters.

We are totally independent and we will give experienced opinion free from corporate jargon and hard sell. Being independent of any contractor, supplier or installer we are able to offer unbiased and impartial advice on all aspects of fire safety to our clients.

Our Fire Safety professionals individually are full members of many accredited Institutions within the Fire Safety Profession, such as the Institution of Fire Engineers (UK), Institution of Fire Engineers (India), National Fire Service College, National Fire Protection Association (NFPA), Medic First Aid (USA), International association of Arson Investigators (IAAI) and other reputed institutions. Our professionals have extensive technical expertise, practical experience and with their knowledge of fire prevention and protection they are able to develop risk proportionate cost effective solutions without compromising fire safety.

Being ex-CISF officials who had worked as security cum fire consultants of CISF, we also possess vast experience regarding all aspects of security. Further we have associates who are purely security experts and who have vast experience in providing security consultancy.

Our motto is to make INDIA a safer place, at home and at work, throughout business and industry. We offer risk proportionate solutions you can depend on, day in - day out and you'll find everything you need to protect your men and materials from ravages of fire & security threat.

**WE SERVE TO SAVE — OUR SERVICES ARE DEDICATED
FOR MAKING OUR CLIENTS FREE FROM FIRE & SECURITY THREAT AND CONTINUITY OF BUSINESS**

OUR SERVICES

ON-SITE FIRE SAFETY TRAINING / CORPORATE TRAINING

Fire safety training is an essential requirement for every organization in order to protect property, employees, visitors or residents and to ensure the integrity of the workplace. Fire safety training is important - that's why it makes sense to arrange your training with the experts. All of our courses are run by experienced fire officers, who have been carefully selected for their training skills and expertise in all fire related matters. This gives you the benefit of the security and peace of mind that comes from knowing that training has been given by people with a wide experience of fire in different environments and circumstances.

Designed for staff at all levels, our training is interactive and will ensure your people will react swiftly and safely in the event of real incident / fire. Training contains PPT's, videos & practices based on simple scenarios. Different interactive methods are used including experiential learning, small groups, hands-on practice, repetition, trainee panels, periodic evaluation and case studies.

We can provide bespoke Fire Safety Training input appropriate to your needs.

FIRE SAFETY AUDIT- INVESTIGATION OF FIRE :

Owners/occupiers of a factory/building/business house/hotel/multiplex etc. after a thorough fire risk assessment invests considerable amount of money for active & passive fire protection, fire detection & alarm systems to save properties and human lives from ravages of fire. It is also equally important that the owner should ensure that these arrangements will response effectively at the desired level at the time of need. But how he will ensure the compliance? Fire safety audit is the only solution of this problem.

Our audit procedure adopts the same process and principles contained in IS:14889. We are able to visit your premises to carry out in-depth analysis of your current Fire Safety Plan. Our competent fire safety consultants will audit your existing Fire Safety Management Policy, which includes checking certification, your means of escape policy, fire protection equipment, emergency lighting, fire detection, alarm and sprinkler systems, previous audit record, compliance of recommendations etc.

3G Fire Protection & Security (India) is able to provide expertise in carrying out fire investigations to establish the probable cause of fires, to develop solutions aimed at preventing reoccurrences and to develop solutions in other fields of Fire Engineering.

Know the roots of fire safety- enjoy the fruits of duty.

MANAGEMENT OF INDUSTRIAL FIRE SERVICE & SUPPLY OF TRAINED FIRE FIGHTERS

A large number of trained fire fighters and fire officers are available with us. They are well experienced in the management of industrial fire services, fire fighting & rescue operation. All they are professional fire fighters having different length of service rendered in the field. Apart from trained fire fighters we also provide fire tenders & fire extinguishers on rent basis

MAINTENANCE AND SUPPORT

Fire protection requires financial resources for designing & installing the systems. It is necessary to ensure that fire protection systems are tested and maintained. This can sometimes be overlooked as an extra expense that does not directly produce income. As a result, fire protection and maintenance might not be given high enough priority. Sometimes inspection, testing & maintenance jobs are awarded to firms who are not experienced & qualified. It is always essential that these jobs are done by qualified fire professionals.

We have a team of Professionals, who carry out routine service and maintenance of the installed Fire Protection Systems which results in improved fire protection capability, readiness and reliability.

CONSULTATION FOR DESIGNING OF FIRE FIGHTING SYSTEMS

We provide consultation service for installation of Fire Fighting System which involves surveying the project and designing the system as per the NFPA, BIS, TAC, NBC standards & codes. Survey and design philosophy are done by the highly qualified veteran fire professionals who have years long experience in the field of fire protection, fire fighting, use & operation of systems.

PREPARATION OF FIRE MANUAL, PRE-INCIDENT PLANNING, ON-SITE & OFF-SITE EMERGENCY PLAN, CONDUCT OF MOCK DRILL - EVACUATION DRILL

Fire safety is an important responsibility for everyone. Consequences of poor fire safety practices and lack of emergency planning are serious in multistoried complex, industries, warehouse etc. In an effort to prevent fires and minimize the damage to property and loss of life / injury to people when they occur, it is required to develop and implement Fire Safety Plans.

In a multistoried complex evacuation of people in the event of any fire or any other emergency needing the people to safely exit the premises, proper planning and rehearsal of fire exit/evacuation drill is very much essential.

Owners should be proactive in the area of fire safety by developing and implementing a Fire Safety Plan, even in premises that are not required by law to have one. Developing and implementing a Fire Safety Plan will demonstrate your interest in promoting fire safety. Our fire safety professionals are expert in this field and can develop documents which are pertinent, easy to understand and implement.

SECURITY CONSULTANCY AND SECURITY AUDIT

Many business establishments, industries, factories are extremely insecure due to inadequate security policy and arrangement. Though the degree of threat may vary according to location and other factors, industry in general is vulnerable to pilferage, sabotage, labour unrest, fraud, corruption, attacks and extortion by terrorists and extremists.

It is the responsibility of the owners /stakeholders to take sufficient and reasonable steps to secure their men and materials/property. This necessitates that firms take necessary precautions against all types of crimes. Therefore, it is essential to install the best possible security system according to the prevailing threat perception. Further, with the changing circumstances security threat perception and counter measures require review and it is equally important to audit the security system in existence periodically. These jobs should be done by professionals having practical experience in security management. Our security consultants are from a premier security force of the country that are versatile and have practical experience in security management.

Our competent security consultants will study the existing security set-up including physical security measures, efficacy of the security procedures as well as systems in place, evaluation of gadgets installed and how well are these being used and will suggest risk proportionate cost effective security management solutions.
